City of Toronto | 1960 to 2012 Income Maps & Charts

Two key national income trends — the growing gap between the rich and the poor and the progressively smaller middle-income group — have major social implications at the neighbourhood level that we are only beginning to identify, understand, and explain.

# Average Employment Income, Metro Toronto, 1960

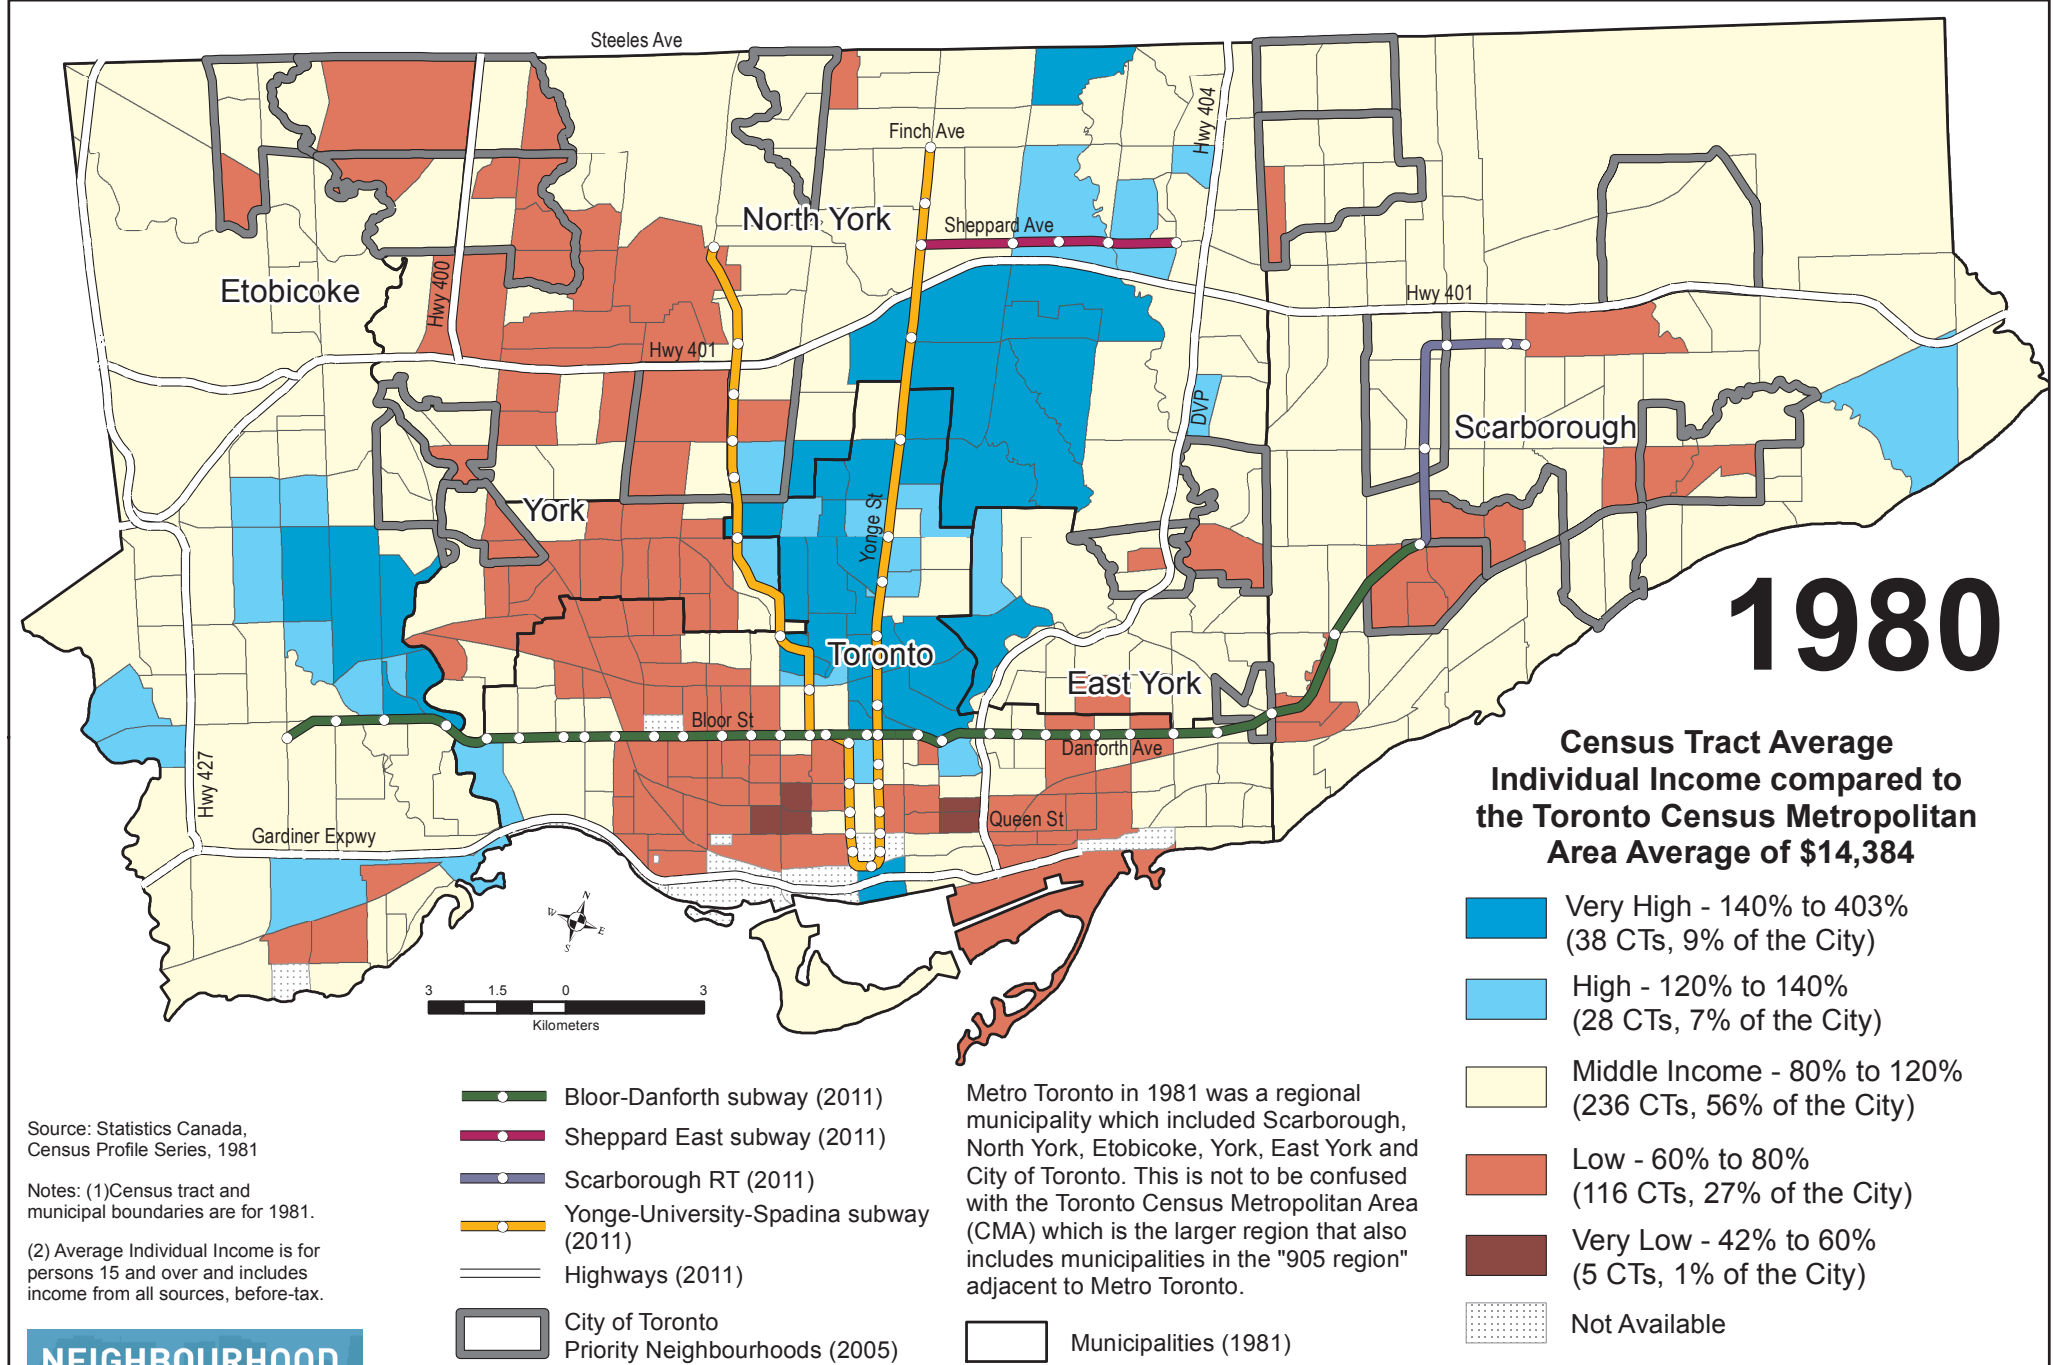

# Average Individual Income, Metro Toronto, 1970

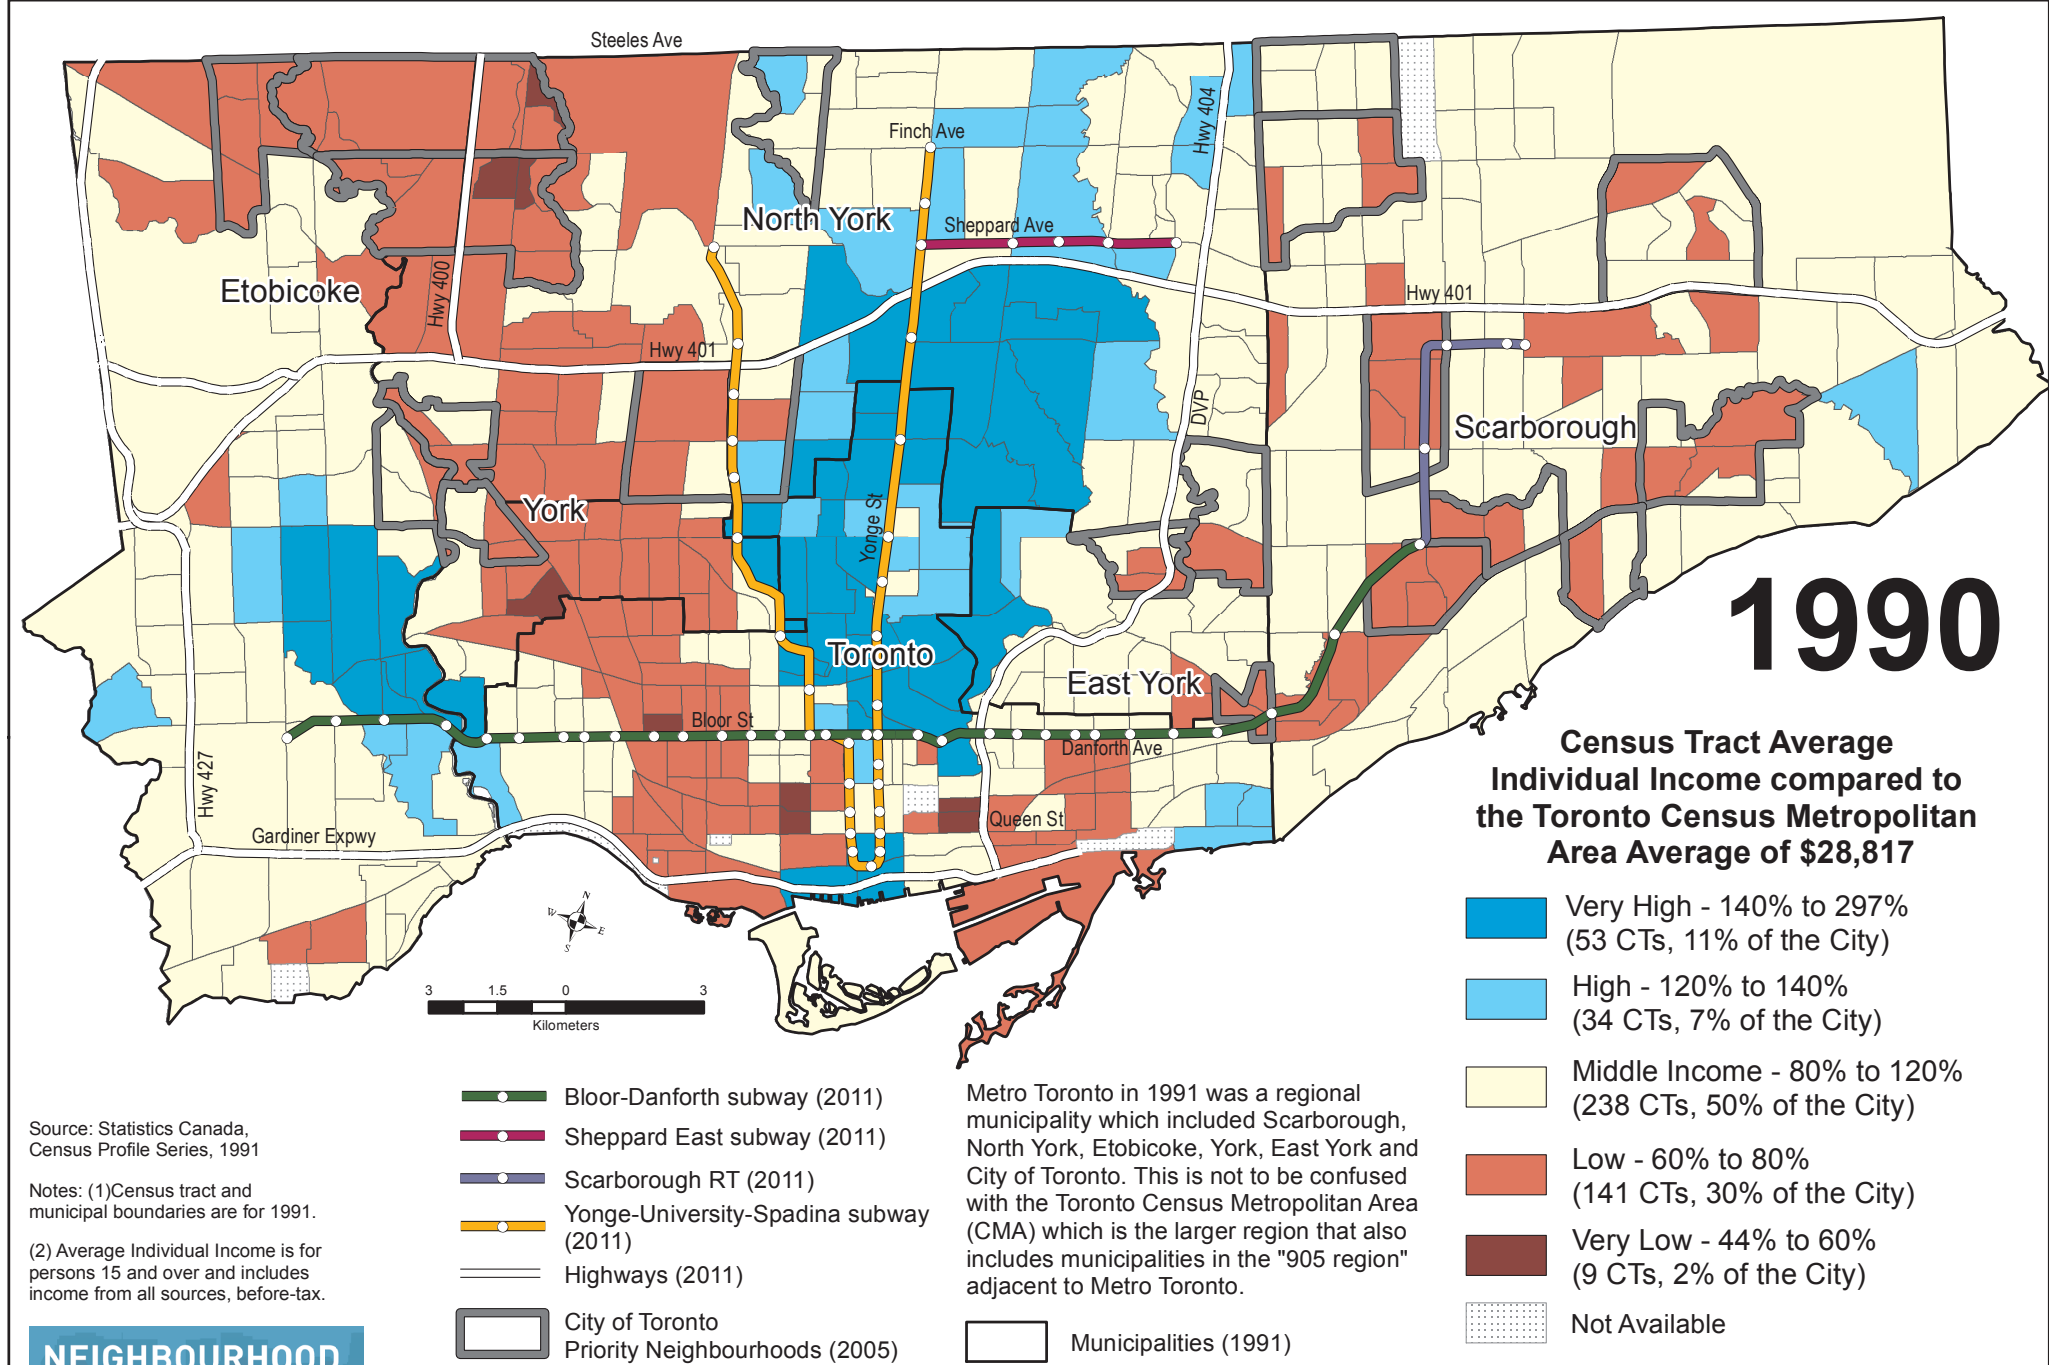

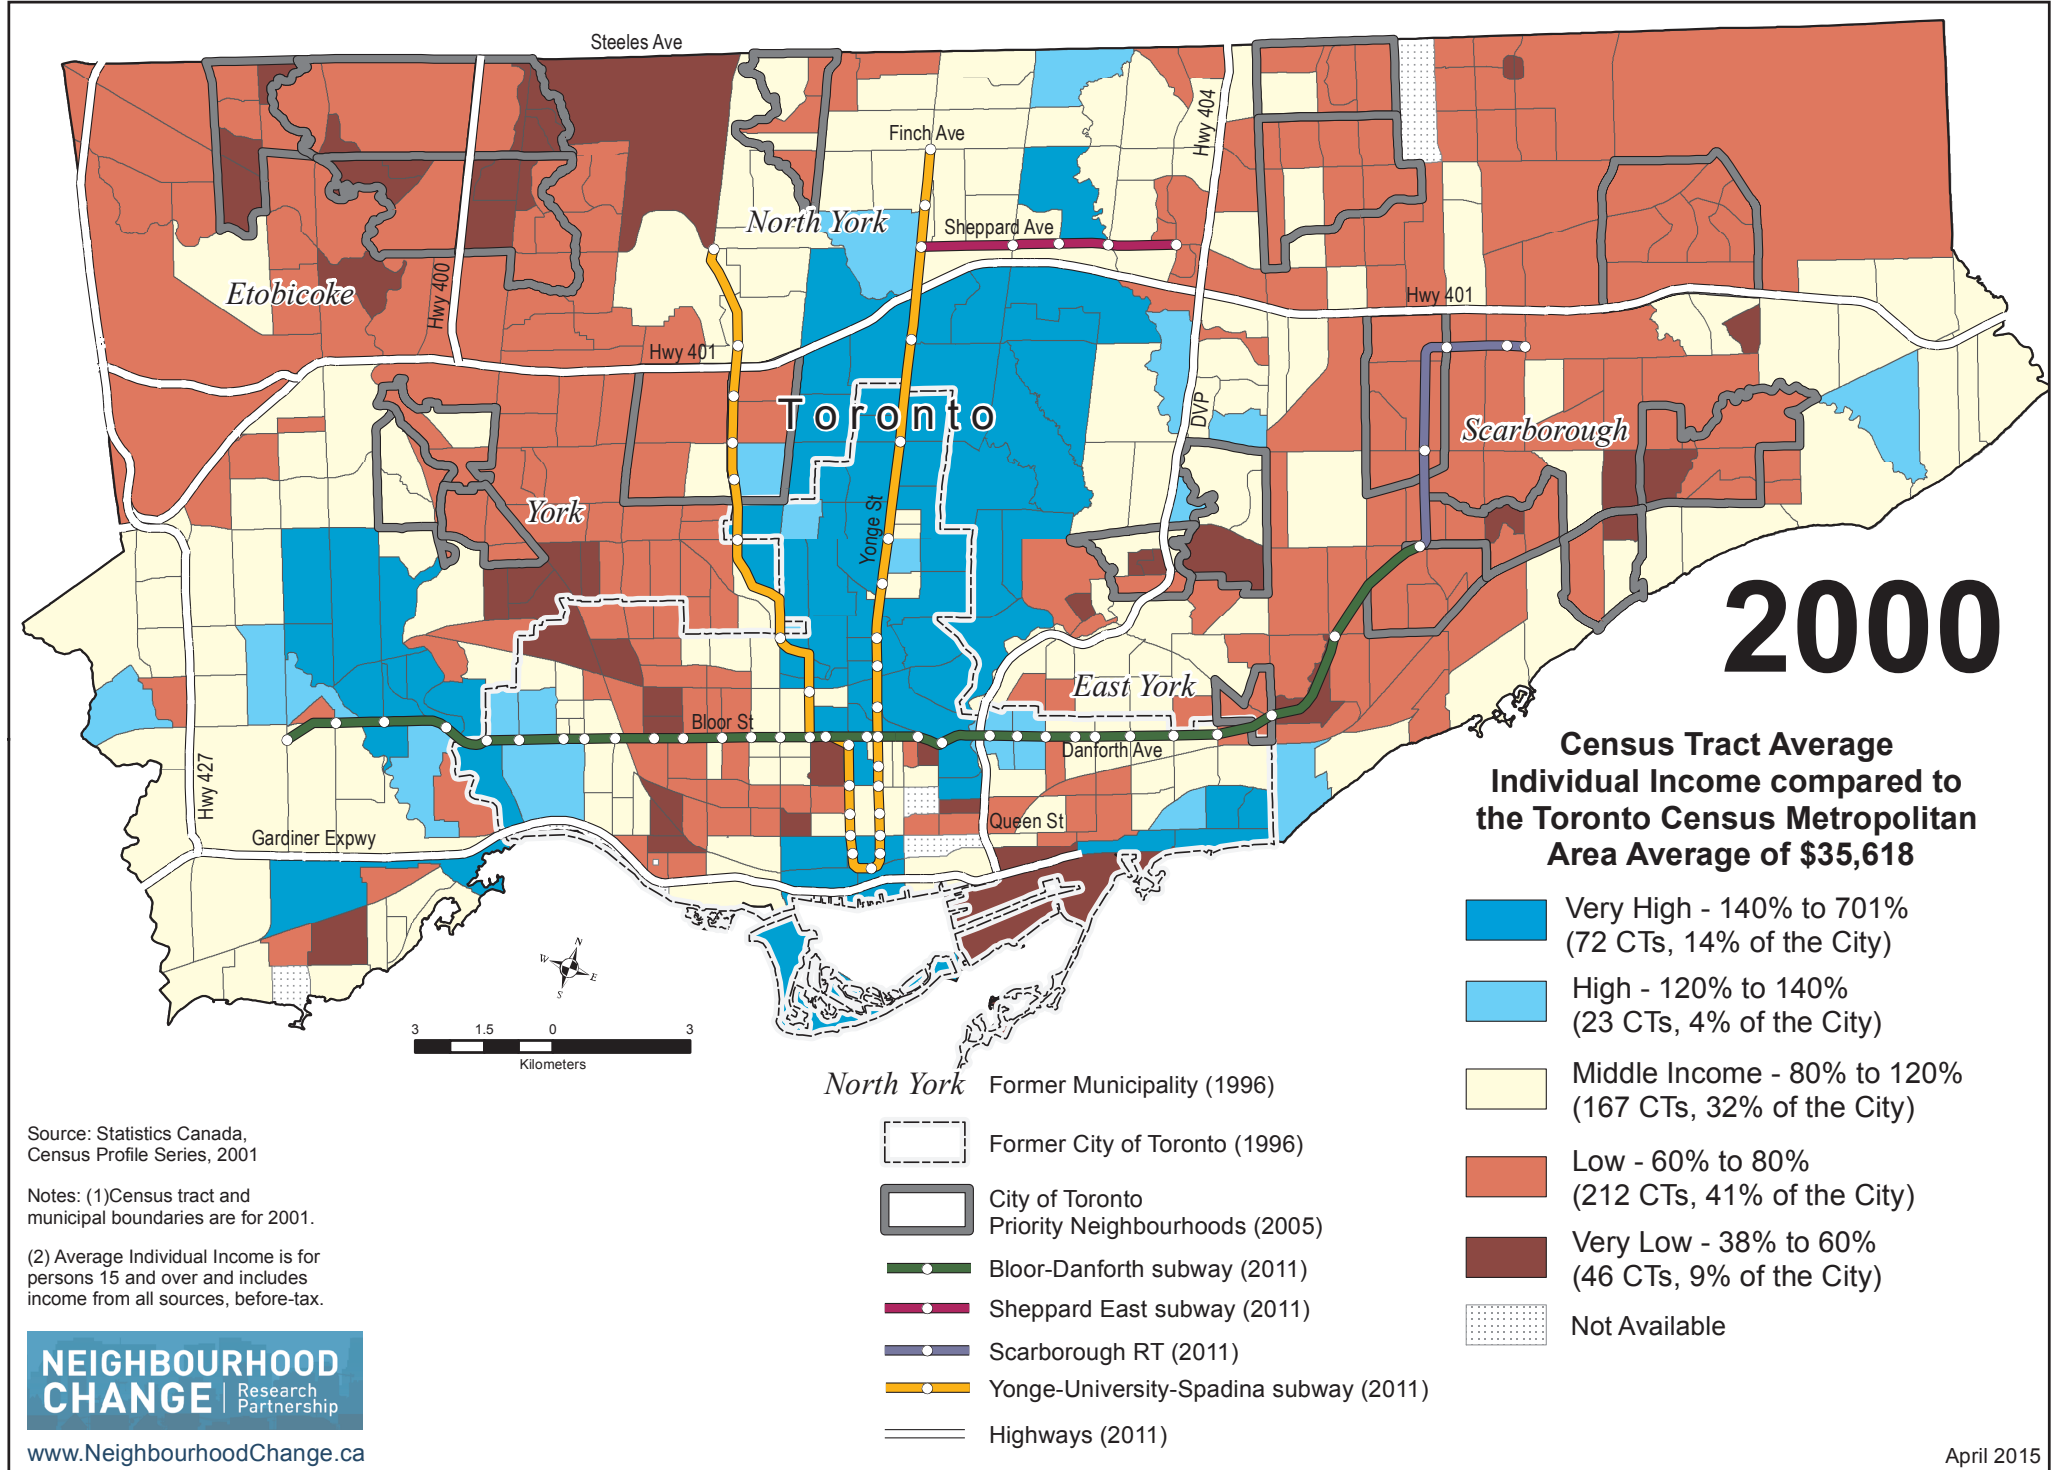

# Average Individual Income, Metro Toronto, 1980

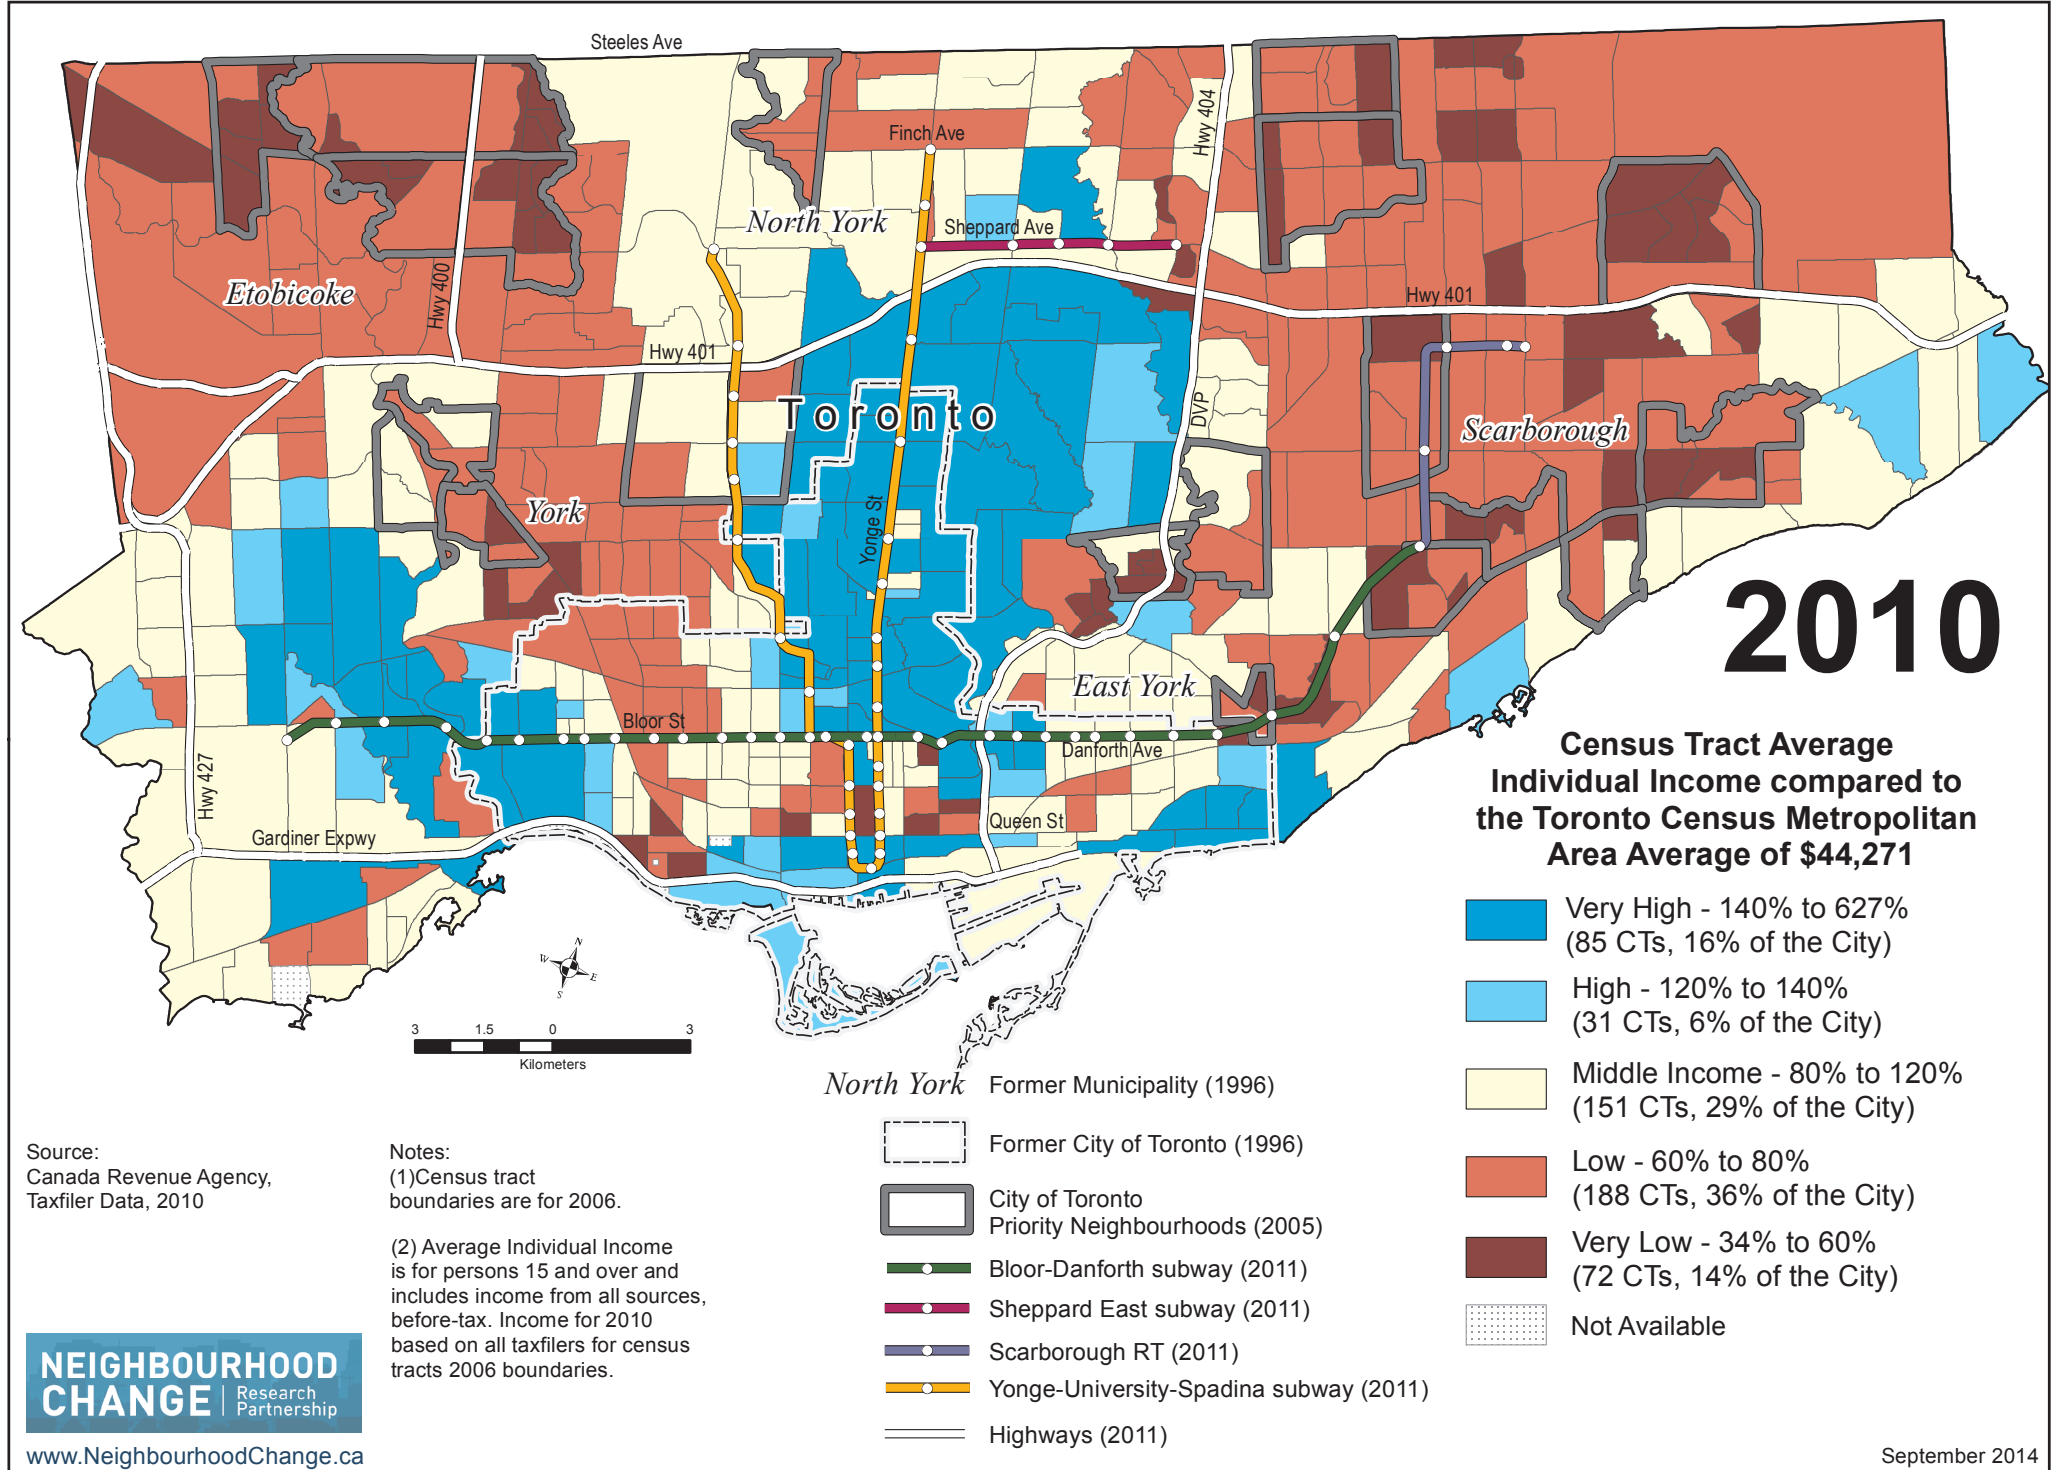

# Average Individual Income, Metro Toronto, 1990

# Average Individual Income, City of Toronto, 2000

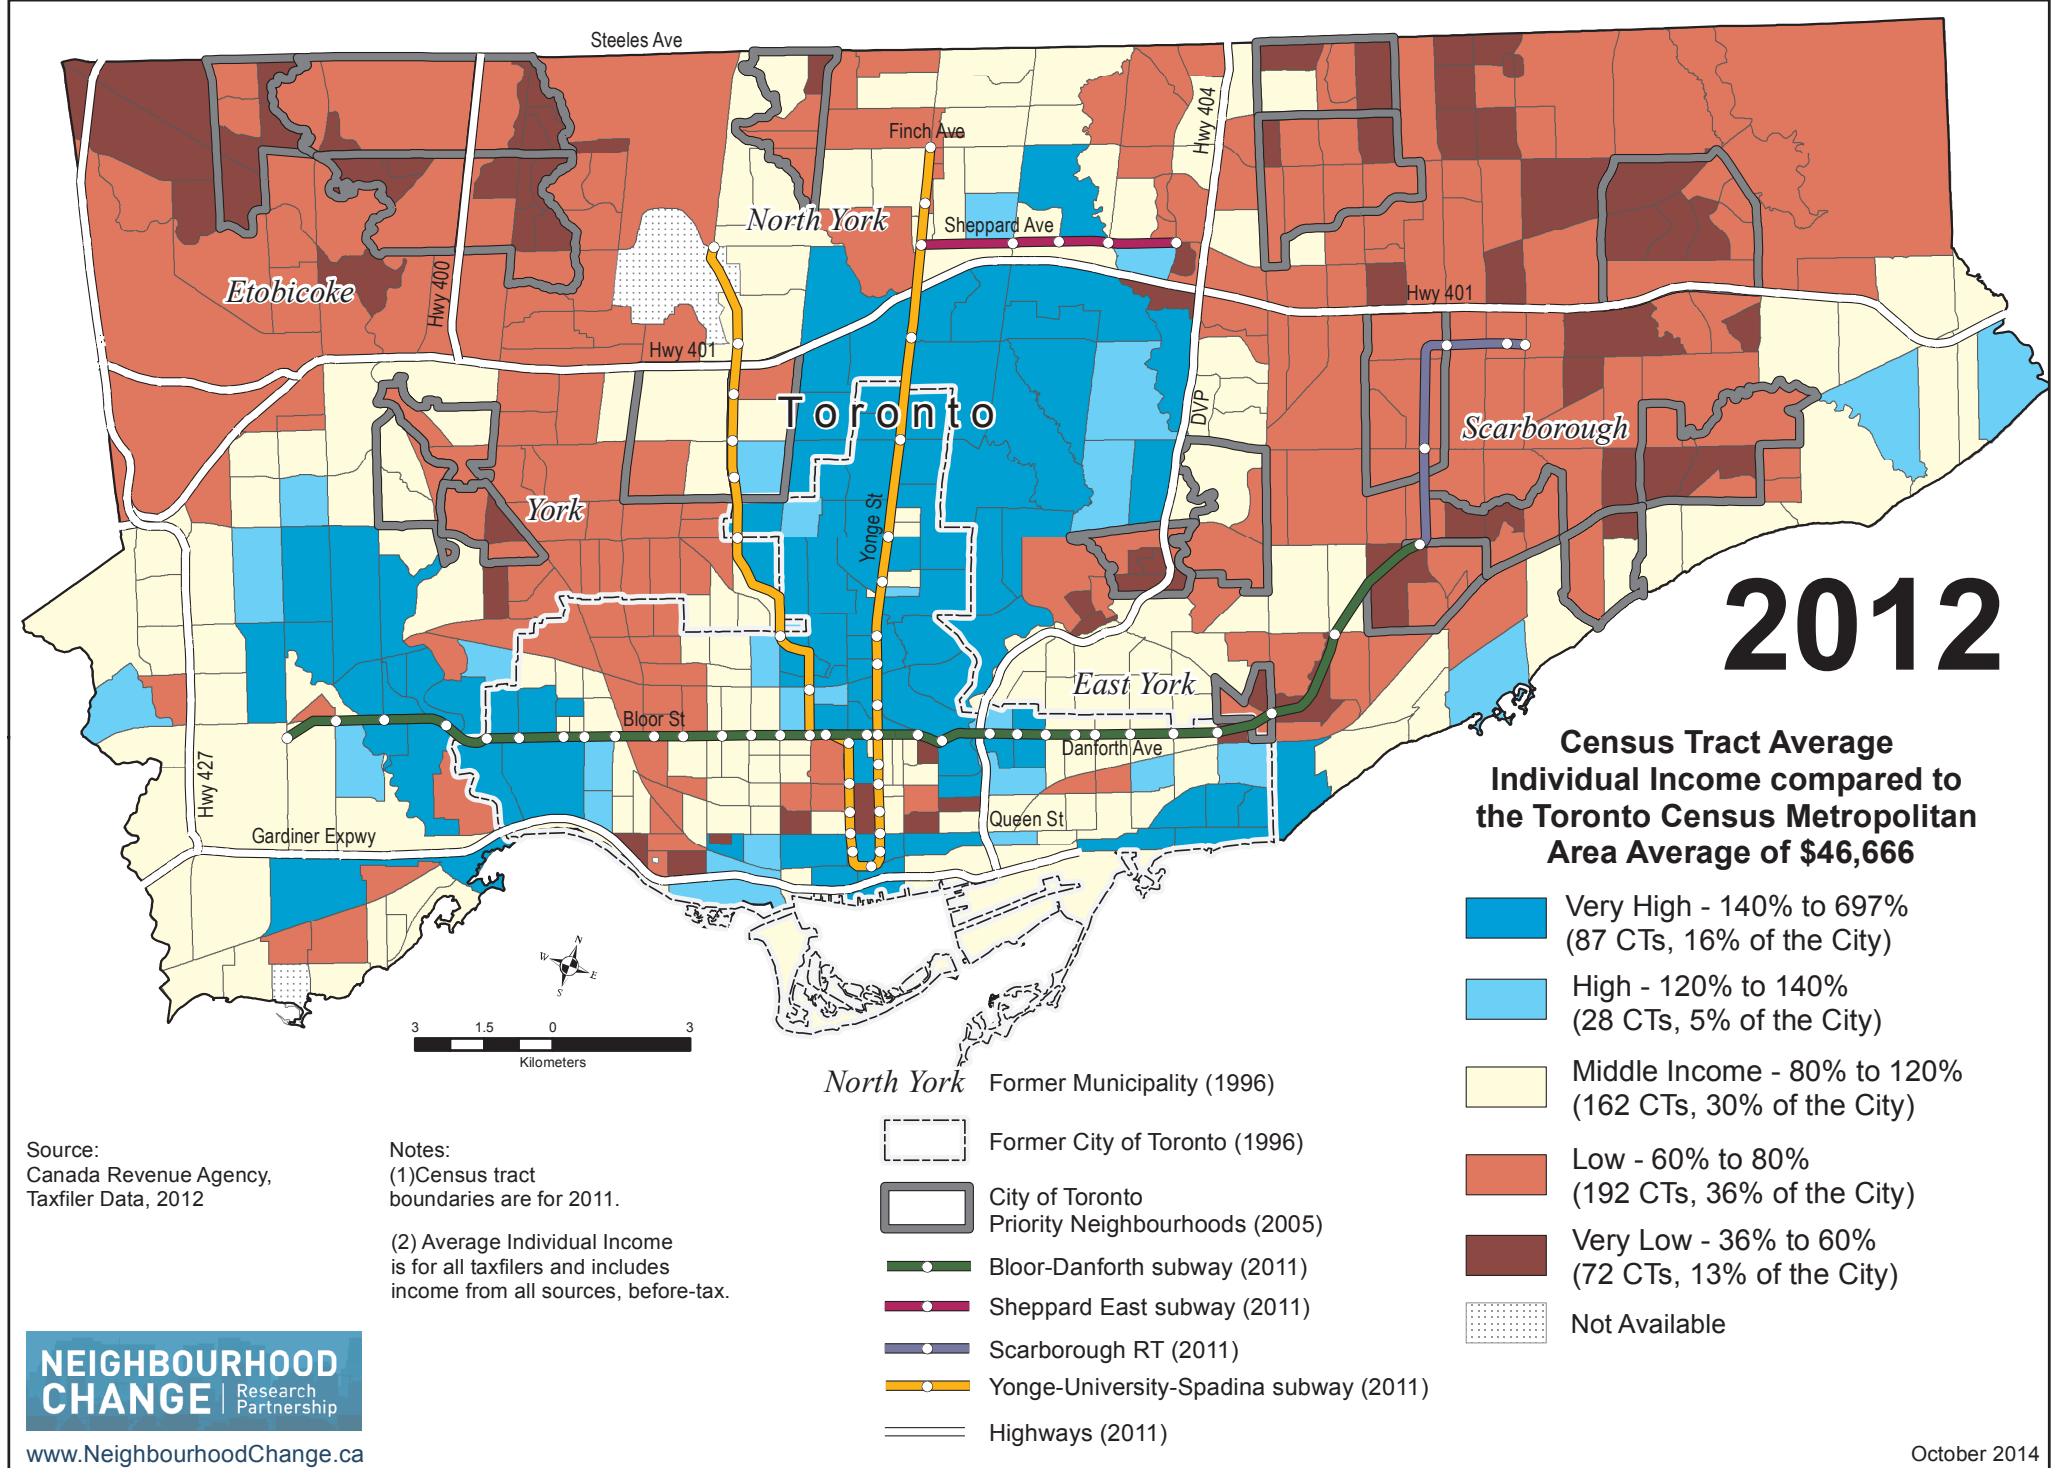

# Average Individual Income, City of Toronto, 2010

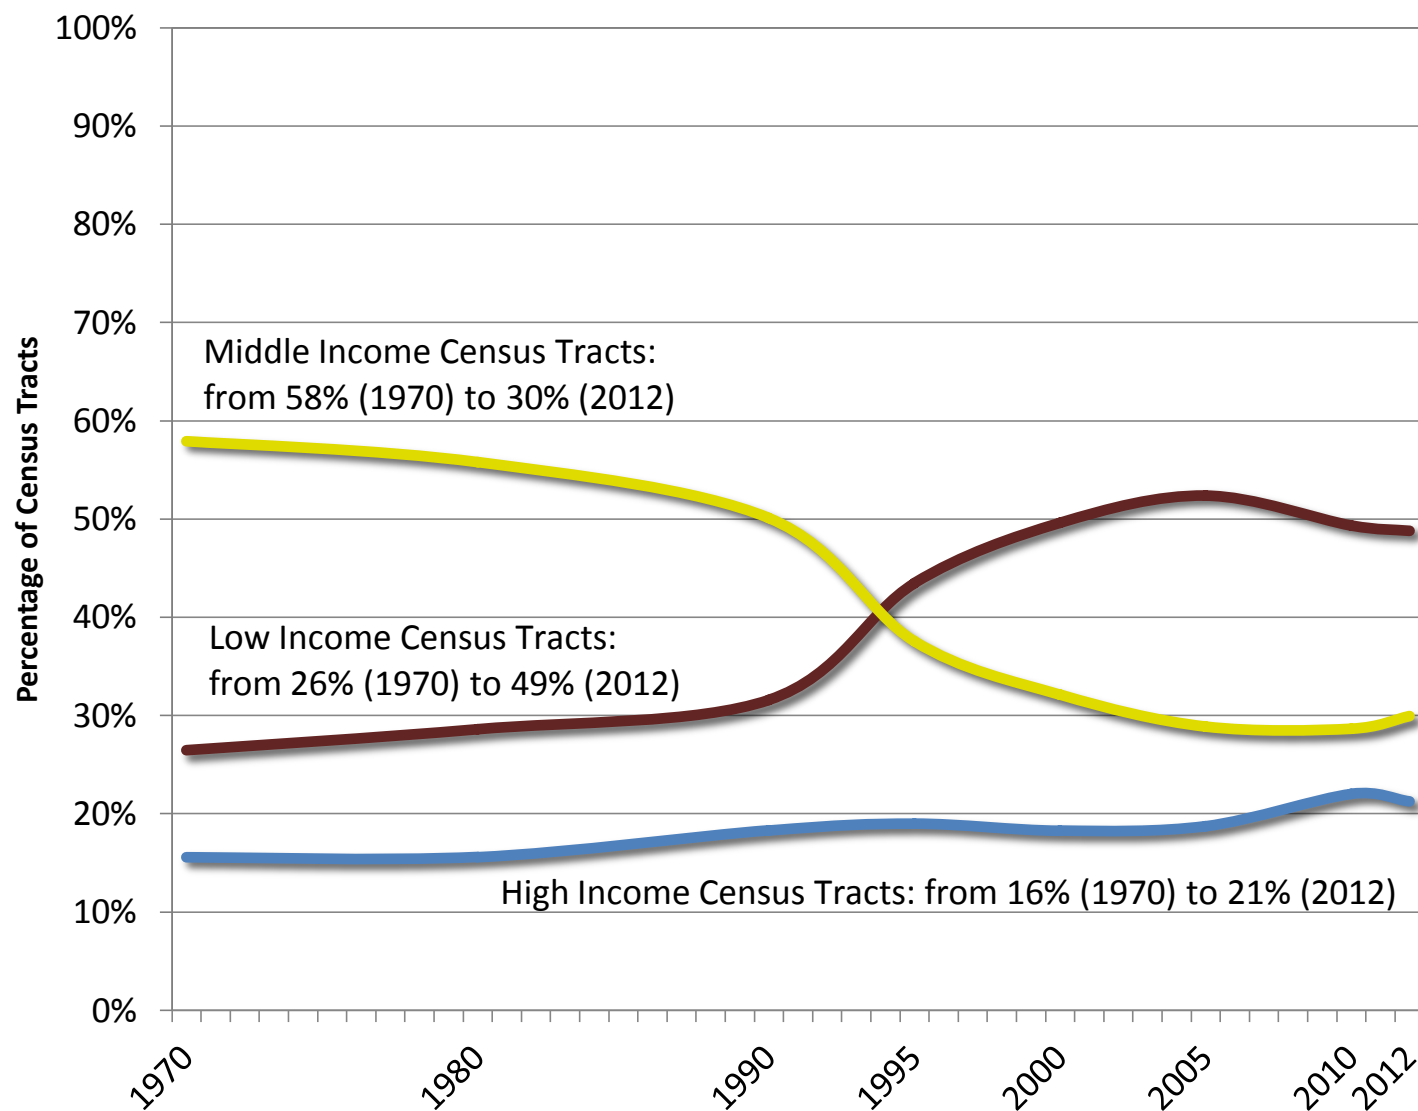

# Average Individual Income, City of Toronto, 2012

# Changing Income Distribution in the City of Toronto, 1970-2012

## Income Categories

**Low income:** more than 20% below the Toronto average

**Middle income:** within 20% of the Toronto average

**High Income:** more than 20% above the Toronto average

## Notes

Census tract average individual income from all sources, before-tax. Income is measured relative to the Toronto metropolitan area average each year. Income 1970-2005 is from the Census. Income for 2010-2012 is Canada Revenue Agency taxfiler data.

Data provided by the 2011 National Household Survey (NHS) has been proven to be untrustworthy. No NHS data is used here.

## Neighbourhood Income & Population, City of Toronto, 1970–2010

# Change in Neighbourhood Income Distribution in the City of Toronto, 1970–2012

# Neighbourhood Income Distribution, 1960–2012, City of Toronto

Notes: Based on average income of census tracts relative to Toronto CMA average. Low income less than 80%; middle income 80% to 119.9%; high income 120% and higher. Before-tax employment income for 1960, before-tax individual income from all sources for 1970–2012.

# Census Tract Average Individual Income, Low to High

## City of Toronto, 2012

Note: Census tract average income of taxfilers from all sources, before-tax. 541 census tracts (Census 2011).

## Census Tract Average Income Decile Thresholds, City of Toronto, 2012

Note: Deciles are specific to City of Toronto. Census tract average income of individual taxfilers from all sources, before-tax. Census tract boundaries for Census 2011 (N = 541).

Why worry about more  
rigid socio-spatial divisions  
and greater inequality?

“Inequality promotes strategies  
that are more self-interested,  
less affiliative, often highly  
antisocial, more stressful, and  
likely to give rise to higher levels  
of violence, poorer community  
relations, and worse health.”

Richard  
Wilkinson,  
*The Impact  
of Inequality*,  
2005, p.22.

# NEIGHBOURHOOD CHANGE

## Research Partnership

Scholars around the world have documented increased income polarization and ethno-cultural divides in large cities. These trends are known in the research literature as that of divided cities, dual cities, polarized cities, and the like.

Though many of the trends are global, they play out at the local level. Can growing socio-economic and ethno-cultural divides be mitigated? Can we find ways to promote a society in which all have fairer access to the opportunities and benefits that cities and neighbourhoods provide?

Thanks to a seven-year grant of \$2.5 million from the Social Sciences and Humanities Research Council of Canada, together with support from the University of Toronto and partner organizations, the Neighbourhood Change Research Partnership is seeking answers to these questions.

### Focus of the Neighbourhood Change Research Partnership

Our partnership is specifically examining inequality, diversity, and change at the neighbourhood level in Canada's metropolitan areas, with an in-depth focus on Halifax, Montréal, Toronto, Winnipeg, Calgary, and Vancouver, where local research teams will carry out city-specific studies. We are identifying trends and seeking to explain the processes causing the trends, as well as the consequences and their implications for public policies and programs. We will investigate how these trends and processes relate to segregation and disadvantage arising from age, gender, race, ethnicity, Aboriginal identity, and immigration status.

We will identify both broad public policies and specific local actions that may help mitigate the causes and consequences of socio-spatial segregation and disadvantage.

### How inequality affects cities

Although inequality is not solely an urban problem, wealth and poverty tend to be concentrated in cities, where reactions to inequality have been expressed in demonstrations and outbursts of violence. Riots in England in 2011 and in Paris in 2005 were triggered, at least in part, by problems of inequality and unequal access to opportunities.

More research is needed on how inequality affects different cities in different ways. What factors accelerate or slow down the trend towards inequality, or even prevent it from occurring? Can successful interventions be used elsewhere to achieve the same results?

### Research questions

In our analysis of socio-spatial change in urban areas, we are seeking answers to questions about: the nature and causes of neighbourhood restructuring trends and processes, both social and physical; the human and urban consequences of socio-spatial income inequality and polarization; policy and program responses (or the lack of them) at all levels of government; and the development of new or more effective policies and programs.

# NEIGHBOURHOOD CHANGE

## Research Partnership

### Why look at neighbourhoods?

Researchers and policy makers agree that neighbourhoods shape people's routines and quality of daily life, affect access to services, and influence overall well-being. For example, living in a poor neighbourhood can reduce an individual's opportunities to secure a quality education, find employment, or gain access to needed services.

Although we know that the negative consequences of inequality and polarization are concentrated in certain neighbourhoods, we need to better understand how broad socio-economic trends are affecting neighbourhoods, how different neighbourhoods affect the lives of the people who live in them, and how public policies reinforce or reduce inequalities and access to opportunities at neighbourhood and city-wide levels. Improved knowledge in these areas can help inform public debate about these important trends and improve policy and program responses.

### Researching neighbourhood trends in seven Canadian metropolitan areas

The Neighbourhood Change Research Partnership builds on a multi-year study that identified and mapped trends in neighbourhood inequality in Toronto over 35 years. *The Three Cities in Toronto*, a report that came out of that research, has been extensively discussed in the media, universities, government, and community agencies.

Our current research in Halifax, Montréal, Toronto, Hamilton, Winnipeg, Calgary, and Vancouver is the first major study of these trends across Canada and one of the few studies in any country to cover a 40-year period.

We will compare the seven Canadian cities with one another and with comparable American and European cities to learn how inequality is aggravated or lessened by the local economy, geography, history, public policies, and social structures within each urban region. An important part of this research is to identify policies and programs that reduce the negative effects of inequality.

### Sharing the findings and encouraging debate

In addition to publishing findings in academic journals and books, our research partnership will engage policy makers and the public through media briefings and broadcasts, community research days and forums, and active local neighbourhood research networks.

### Building partnerships for change

It takes the knowledge and skills of a diverse team to define important and socially relevant research agendas. Our research partnership includes Canadian and international scholars from geography, social work, political science, sociology, planning, economics, criminology, and education. Many public, private, and non-profit partners are helping us plan, implement, and share the research.

In addition, local advisory networks of policy makers and community organizations will provide input on specific city studies, engage community residents, give feedback on findings, and inform stakeholders in all seven urban regions.

## Research Partnership

### Research Management

The Neighbourhood Change Research Partnership is funded by the Social Sciences and Humanities Research Council of Canada, together with support from the University of Toronto's Factor-Inwentash Faculty of Social Work and many partner organizations and universities in Halifax, Montréal, Toronto, Hamilton, Winnipeg, Calgary, and Vancouver.

**Principal Investigator:** J David Hulchanski, Factor-Inwentash Faculty of Social Work and Cities Centre, Dr. Chow Yei Ching Chair in Housing, University of Toronto.

**Research Manager:** Emily Paradis, Factor-Inwentash Faculty of Social Work, University of Toronto.

**Data Analyst:** Richard Maaranen, Factor-Inwentash Faculty of Social Work, University of Toronto.

**Board of Directors:** Barb Besner, United Way Winnipeg; Jino Distasio, University of Winnipeg; Leslie Evans, Federation of Calgary Communities; Kathleen Gallagher, University of Toronto; Scott Graham, Social Planning and Research Council of BC; Jill Grant, Dalhousie University; Richard Harris, McMaster University; Leanne Holt, Federation of Canadian Municipalities; J David Hulchanski, University of Toronto; Michelynn Laflèche, United Way Toronto; David Ley, University of British Columbia; Robert Murdie, York University; Valerie Preston, York University; Damaris Rose, Université INRS, Montréal; Ivan J Townshend, University of Lethbridge; Kasia Tota, Halifax Regional Municipality; Alan Walks, University of Toronto.

**Research Advisory Board:** Caroline Andrew, University of Ottawa; Larry S Bourne, University of Toronto; Tom Carter, University of Winnipeg; Duncan MacLennan, University of St Andrews, Scotland; Bill Michelson, University of Toronto; Janet L Smith, University of Illinois at Chicago.

**Data Analysis Advisory Group:** Larry S Bourne, Xavier Leloup, David Ley, Richard Harris, J David Hulchanski, Richard Maaranen, Robert Murdie, Howard Ramos, Damaris Rose, John Stapleton, Ivan J Townshend, Alan Walks.
